First Quarter 2006 Activities

During the first quarter, license sales amounted to 1,345 K€ as compared with 1,843 K€ in 2005 and represent 66.6% of total sales for the first quarter of 2006. This decrease is due to delays of new incoming orders from corporate customers and distributors who are already anticipating the release of the new version 6.0 to replace the current version 5.0 products.

Sales for the *Professional Services* business unit increased by 26.6% when compared with same period last year thanks to additional orders received from US Federal Government.

During the first quarter of 2006 SYSTRAN entered into new partnerships and launched a new product targeted for PDA use which has not yet produced sales.

2006 Outlook

SYSTRAN aims to direct its efforts in the *Software Publishing* activities and the development of the new version 6.0 software products. Version 6.0 will offer many new features to users as well as introduce new language pairs.

This new version will be available during the fourth quarter of 2006 and will replace the version 5.0 product line that was released in 2004.

Software licenses are expected to grow throughout all markets in 2006 and the company continues to reinforce its sales and marketing teams.
