

## **FIC 2016: SYSTRAN to present powerful language technologies that preserve data security**

**Paris, 14 January 2016 - SYSTRAN will be present at the International Cybersecurity Forum in Lille as a silver sponsor.**

The International Cybersecurity Forum (FIC) is a platform aiming to promote a Pan-European vision of cybersecurity and strengthen the fight against cybercrime. Jointly organized by the Department of the National Gendarmerie, CEIS and EuraTechnologies, and co-financed by the Regional Council of Nord-Pas-de-Calais, the FIC will take place in Lille on 25-26 January 2016.

This 8<sup>th</sup> edition will focus on data security and privacy. The forum will provide the platform for an open, participatory discussion involving service providers, trusted security solution professionals as well as end users from the public and academic sector. SYSTRAN will be attending as a silver sponsor.

For decades, SYSTRAN has been developing intelligent language technologies that empower global companies, defense and security organizations, and public agencies to quickly understand and process **digital forensic analysis** of unstructured multilingual data. With powerful on premises language solutions, SYSTRAN meets their high expectations in terms of confidentiality and data security. On top of that, analysis of textual, audio or image data is available for over **45 languages** including those most spoken around the world and those spoken in the Middle East.

*“The FIC is a great platform to educate representatives from the private, public, and academic sector on data leakage or loss of confidentiality while using free online translation services. We are proud to be among the official sponsors and to present our language technologies that enhance multilingual analysis capabilities,”* said Emmanuel Tonnelier, Senior Account Manager EMEA, Defense and Security at SYSTRAN.

## 🔗 About SYSTRAN

For over four decades, SYSTRAN has been the market leader in language-translation products and solutions, covering all types of platforms, from desktop to internet and enterprise servers.

To help organizations enhance multilingual communication and increase productivity, SYSTRAN delivers real-time language solutions for internal collaboration, search, eDiscovery, content management, online customer support and e-Commerce.

With the ability to facilitate communication in 130+ language combinations, SYSTRAN is the leading choice of global companies, Defense and Security organizations, and Language Service Providers. SYSTRAN is also the official translation solutions provider for the S-Translator, a default-embedded app on the Samsung Galaxy S and Note series.

Since its early beginnings, SYSTRAN has been pioneering advances in machine translation and Natural Language Processing. Its latest achievement, a new-generation Hybrid MT, combines the predictability and language consistency of rule-based machine translation with the fluency of statistical MT.

SYSTRAN is headquartered in Seoul with offices in Daejeon, South Korea; Paris, France; and San Diego, USA.
